SRIRAM C

sriram451803@gmail.com 9384726360 Tiruppur, Tamil Nadu Sriram C Sriram

OBJECTIVE

Motivated and enthusiastic Computer Science graduate seeking to begin a career in software development. A dedicated and fast learner with a strong commitment to continuously enhancing technical skills and applying knowledge to solve real-world problems.

INTERNSHIP

Completed 15 days internship in **Web Application Development** at Intech Digital Solution**(**Dec 05 2023 -Dec 20 2023). .

Learning Outcome: Gained hands-on experience in developing responsive and user-friendly web interfaces using HTML, CSS, JavaScript, and React.js.

Completed 31 days internship **in Python Full Stack Development** at Pantech E-Learning (June 2023 – July 2023).

Learning Outcome: Acquired practical skills in frontend and backend web development, UI design, server-side scripting, and database management.

EDUCATION

B.E. Computer Science, ***Karpagam Academy of Higher Education*** — 2022 – 2026
CGPA: 8.4 — Coimbatore

Higher Secondary Certificate, *Kongu Marticulation Higher Secondary School* — 05/2022
Percentage: 81% — Tiruppur

Secondary School Leaving Certificate, *Kongu Marticulation Higher Secondary School* — 05/2020
Percentage: 64% — Tiruppur

SKILLS

TECHINCAL SKILLS

Programming Languages: C++, Python,Java(basic)
Web Desgin: HTML, CSS, JavaScript
Frameworks & Tools: React, TailwindCSS
Core Concepts:Computer Networking,Cloud Computing
Database: SQL
Others: Git, UI/UX

SOFT SKILLS

- Adaptable
- Collaborative
- Quick Learner

PROJECTS

Smart Tools Web App – A Collection of Everyday Utilities
Technologies Used: HTML, CSS, JavaScript
Built a multi-tool web application integrating core front-end technologies like HTML, CSS, and JavaScript. Implemented utilities such as a Calculator, Temperature Converter, and Stopwatch with features like input validation and custom UI components.

RetinaFL – A Real-Time Federated Learning System for Diabetic Retinopathy Detection Across Clinics
Technologies Used: Python, TensorFlow Federated, MobileNetV2, Differential Privacy
Duration: April 2025 – September 2025
Developed a privacy-preserving federated learning framework for early detection of Diabetic Retinopathy. Implemented CNN-based classification (MobileNetV2) and integrated Differential Privacy to ensure patient data security, achieving 92.4% accuracy and real-time inference on edge devices.

CERTIFICATIONS

- C++(Infosys springboard)
- Computer Networks (Simple Learn)
- Cloud Computing(Simple Learn)
- SQL for Beginners (Scalar)
